
Flame Retardant Plasticizer

WSFR- TXP

Product Name: WSFR-TXP
Chemical Name: Trixylyl phosphate

Typical properties:

Phosphorus content (wt. %) 7.6 (Theory)

Specification:

Appearance	Colorless to yellow transparent liquid
Color (APHA)	≤200
Acid Value (mg KOH/g)	≤0.1
Water content (wt. %)	≤0.1
Viscosity (25°C, mPa·s)	105-145
Density (25°C, g/cm ³)	1.145±0.010

Application:

WSFR-TXP is a phosphate flame retardant plasticizer, whose superiority is demonstrated in low volatility, excellent hydrolysis stability, good thermal stability, superior lubricity and so on. It is recommended as plasticizer for vinyl resin and cellulose resin. It is also used as a fire resistant hydraulic fluid and a lubricant additive.

Packaging:

230 kg in iron drum.
